

Food Safety and Innovation in Non-Food

ALTRO APAC Altro K30 Safety Flooring

Altro K30 is a 3mm thick flooring designed for safety in wet and greasy conditions where frequent spillage is likely. This product is therefore ideally suited for, and commonly used in, commercial kitchens and other food-handling environments. Boasting the highest rating possible for slip resistance in a resilient floor, it minimises the risk of slipping in these heavy traffic areas.

ONERGY Onergy endoCube

The endoCube is a NON-Electrical / NON-Mechanical Food simulant contained in an enclosure. When retrofitted onto existing Air Temperature sensors in refrigerators & freezers, they ensure the sensors monitor 'Food' temperature rather than 'Air' temperature.

TESTO Testo 175-T2

The testo 175 series consists of four compact data loggers for the measurement of temperature and humidity. All data loggers include a USB and SD interface, creating a simple readout of the data. The high memory capacity of 2 million measurement readings and the power supply using conventional batteries are further advantages of the products. In addition, the instrument includes a free user friendly software, testo ComSoft Basic 5.

BASF- THE CHEMICAL COMPANY Phantom Insecticide

Phantom insecticide is a major breakthrough in pest control for Australia, with unique properties that make it unlike other insecticides. The really important and unique physical property of Phantom is that it is undetectable to pests. This means they will not avoid the treated areas and unknowingly pick up a lethal dose.

SYMETEC Baxx

Baxx is an airborne pathogen removal system, which uses hydroxyls produced by a cold plasma field. Maintenance free, the Baxx kills bacteria, viruses, mould and fungus by disrupting the pathogen's cell walls.

AERIS ENVIRONMENTAL AerisGuard

Aeris Hygiene Services is Aeris's cold storage service division specifically set up to provide biofilm remediation and protection for all types of cooling (FDC's, humidifiers, AHU's) circuits in commercial scale cold storage facilities.

ACTIVEION INTERNATIONAL Activeion ionator EXP™

The ionator EXP™ from Activeion is a handheld device that uses an electrical charge to temporarily ionize regular tap water and transform it into a powerful cleaner and sanitizer – without using chemicals.

FLEXSIL-LID Flexsil-lid

Made from Food Grade silicon and using its patented 'lip-lock' design, the Flexsil-lid is designed to fit all standard Gastronorms or steam pans, covering the contents to maintain freshness longer when stored, or speed up the cooking time if used in ovens. This is achieved by trapping the heat inside the pan acting as an incubator.

DYSON A01 Airblade

Dyson A01 Airblade hand dryers deliver a fast HACCP approved hygienic hand drying solution with significant cost and energy savings for food industry operators. Featuring a hospital-grade HEPA filter and Dyson patented digital motor, the Dyson Airblade hand dryer eliminates 99.9% of bacteria to ensure hands are hygienically dried in just ten seconds.

SCHÜTZ Schütz 6 layer IBC

The Schütz 6 layer IBC (Intermediate Bulk Handling) is a new packaging application for liquid food products. Using HACCP accredited and state of the art 'Clean Room' facilities in Melbourne, the innovative 'Security Layer' IBC contains as many as six different protective layers, including an EVOH layer that not only prevents permeation, but also acts to increase the shelf life of products stored inside the containers.
